Grammar

القواعد

المضارع البسيط Present Simple

يستخدم للحديث عن الأشياء التي تحدث بانتظام أو العادات أو الحقائق

التكوين

1

الاجبائي

التركيب ← الفعل + الفاعل

He works every day

هو يعمل كل يوم

مثال

مع المفرد و He She It
نضيف s الى نهاية الفعل

مع الجمع و I You We They
الفعل يكون بدون إضافات

2

النفي

التركيب ← الفعل + do/does + not + الفاعل

They do not like coffee

هم لا يحبون القهوة

مثال

مع الجمع و I You We They
نستخدم do بدلاً من does

مع المفرد و He She It
نستخدم does بدلاً من do

3

السؤال

التركيب ← الفعل + الفاعل + do/does

Does he like pizza?

هل هو يحب البيتزا؟

مثال

مع المفرد و He She It
نستخدم does بدلاً من do

مع الجمع و I You We They
نستخدم do بدلاً من does

الكلمات الدلالية

Regularly

بانتظام

Sometimes

أحياناً

Often

غالباً

Never

أبداً

Usually

عادةً

Always

دائماً

Every

كل

إذا كان الفاعل He She it أو أسم مفرد يُضاف s وأحياناً es الى نهاية الفعل

تمارين المزارع البسيط

1

I ___ my homework every day

A

does

B

doing

C

do

D

did

2

How often ___ he read books?

A

are

B

does

C

is

D

do

3

We ___ to the park every Friday

A

go

B

going

C

gone

D

goes

4

They ___ coffee everyday

A

drinks

B

drinking

C

is drinking

هم لعبوا كرة القدم منذ يومين

مع الجملة المثبتة نستخدم
صيغة الماضي من الفعل

2

النفى

التركيب ← الفعل + did not + الفاعل

I did not read the book yesterday

مثال

أنا لم أقرأ الكتاب أمس

مع الجملة المنفية نستخدم
الشكل الأساسي للفعل

3

السؤال

التركيب ← الفعل + الفاعل + did

Did you visit your family last week?

مثال

هل زرت عائلتك الأسبوع الماضي؟

مع الجملة الإستفهامية نستخدم
الشكل الأساسي للفعل

الكلمات الدلالية

Yesterday

أمس

Last (week - month - year)

آخر (أسبوع - شهر - سنة)

In (a specific past year)

في (سنة ماضية محددة)

ago

منذ

تمارين الماضي البسيط

1

Where ___ you go yesterday?

A

did

B

do

C

does

D

gone

2

They did not ___ last week

A

played

B

playing

C

play

D

plays

3

I ___ Paris in 2010

A

visit

B

visits

C

visited

D

visiting

4

They ___ to this city five years ago

A

move

B

moves

C

moving

D

moved

1

A

2

C

3

C

4

المستقبل البسيط Future Simple

يستخدم للحديث عن الأفعال أو الأحداث التي ستحدث في المستقبل

التكوين

1

الاجبائي

التركيب ← الفعل + will + الفاعل

I will go to the store later
سأذهب إلى المتجر لاحقًا

مثال

2

النفي

التركيب ← الفعل + will + not + الفاعل

He will not go to work tomorrow
هو لن يذهب إلى العمل غدًا

مثال

3

السؤال

التركيب ← الفعل + will + الفاعل

Will he travel next week?
هل سيسافر الأسبوع القادم؟

مثال

الكلمات الدلالية

Tomorrow	Next	Soon	Later
غداً	التالي	قريباً	لاحقاً

تمارين المستقبل البسيط

1

I ___ play basketball later

A

am

B

do

C

will

D

go

2

They ___ travel to london tomorrow

A

will

B

are

C

going

D

have

3

I _____ make that mistake again

A

am not

B

will not

C

are not

D

have not

4

___ you attend the football game next week?

A

will

B

have

C

do

D

did

4

A

المضارع المستمر Present Continuous

المضارع المستمر يستخدم للتعبير عن الأفعال التي تحدث في اللحظة الحالية أو المؤقتة

التكوين

1

الإيجابي

التركيب ← ing + الفعل + Am/Is/Are + الفاعل

مع الجمع و You We They
نستخدم are

We are eating breakfast
نحن نتناول الفطور

مثال

2

النفى

التركيب ← ing + الفعل + Am/Is/Are + not + الفاعل

مع الضمير I
نستخدم am

I am not cooking tonight
أنا لن أطبخ الليلة

مثال

3

السؤال

التركيب ← ing + الفعل + الفاعل + Am/Is/Are

مع المفرد و He She It
نستخدم is

Is he feeling well today
هل هو يشعر بخير اليوم؟

مثال

الكلمات الدلالية

Now
الآن

At the moment
في الوقت الحالي

Today
اليوم

Tonight
الليلة

These days
في هذه الأيام

تمارين المظارم المستمر

1

Mohammed ___ playing football tonight

A are

B is

C will

D am

2

They ___ cooking pasta at the moment

جُمْل الوصل Relative Clauses

هي جمل تُستخدم لإضافة معلومات إضافية عن اسم في الجملة سواء كان هذا الاسم
شخصًا مكانًا أو شيئًا

Who

للإشارة إلى الأشخاص

The boy **who** painted is talented
الولد الذي رسم موهوب

Whom

للإشارة إلى الأشخاص أو الأشياء

The doctor **whom** I visited was kind
الطبيب الذي زرتَه كان لطيفًا

Whose

للإشارة إلى الملكية

The book **whose** cover is blue is mine
الكتاب الذي غلافه أزرق ملكي

Which

للإشارة إلى الأشياء

The car **which** he owns is fast
السيارة التي يمتلكها سريعة

Where

للإشارة إلى الأماكن

The place **where** I live is quiet
المكان الذي أعيش فيه هادئ

When

للإشارة إلى الزمن

I wake up **when** the alarm rings
أستيقظ عندما يرن المنبه

تمارين جمل الوصل

1

Go to the shop is next to the pharmacy

A which

B what

C that

D it

2

The student sits next to me in class is called Ahmad

A who he

B that he

C which

D who

3

There are three books in your bag, one do you want?

A that

B which

C what

D this

4

The woman gave the presentation teaches at our university

A who

B which

C that she

D who she

Time connectors مسارات الربط

مسارات الربط هي مخرج الحل لكثير من الجمل

ماضي ← ماضي

إذا مهمتنا هي اكمال الناقص من الزمنين

1 / While / When / As

V2 ماضي بسيط ← Was / were + v.ing ماضي مستمر

إذا مهمتنا هي اكمال الناقص من الزمنين

2 / After / Before / As soon as / By the time / Until

V2 ماضي بسيط ← had + V3 ماضي تام

مضارع ← مضارع

مضارع ← مستقبل

IMPORTANT

يوجد حالة استثنائية لهذه القاعدة

إذا جاء بعد كلمة الربط فراغ مباشرة

أي لم يوجد بعدها فاعل نضيف ing بعد الفعل

Before to bed every night, remember to brush your teeth

(A) go (C) going (B) to go (D) gone

هناك ارتباط دائم بين تعبير (Was - When) وبين الماضي البسيط

لذلك نختار ماضي بسيط كلما رأينا هذا التعبير

Writing Analysis تحليل الكتابة

PUNCTUATION

نقطة نهاية الجملة

I speak Arabic.

علامة استفهام عند نهاية السؤال

Where is my phone?

علامة تعجب عند التعجب

What a beautiful car it is!

الفاعلة العلوية 'تستخدم عند الاختصارات

Chris doesn't have many books

النقطتان الرأسيتان :

بعد كلمة include

قبل بداية العد

I bought 3 items: a shirt, pants, and shoes

الفاعلة السفلية ,

تعديد أكثر من اثنين

Ahmad, Saleh, and Abdullah went out.

قبل كلمات so و but عند ربط جملتين

علامات التنخيص تستخدم مع الكلام المقتبس

They said: "yes"

الفاعلة المنقوطة ;

تأتي كبديل للفاعل العادية وتفضل المنقوطة على العادية قبل كلمة

; However

Passage 1

Giant Panda الباندا العملاقة

- (1) An American-born giant panda will soon be traveling to China. The Chinese government has an agreement with foreign zoos to lend giant pandas out only for scientific study. After a few years, they, and any cubs they may produce, must all be returned to China. Mei Lan, a three-year-old female, is being prepared for her trip to China, where her parents were born. A special FedEx flight from the U.S. is being arranged for her.
- (2) Chinese zookeepers are getting ready for her arrival by planning a special diet, and even language lessons for her. They are advertising for a tutor to teach Mei Lan Chinese. The caretakers at her new home, the Chengdu Panda Research Center in Sichuan, want to help her adapt quickly and feel comfortable in her new environment. Mei Lan has lived at a zoo in the city of Atlanta, Georgia, since her birth, and she is unfamiliar with Chinese. The teacher must have a bachelor's degree or higher and be fluent in both English and Chinese.

According to Paragraph (2), why do the Chinese zookeepers want Mei Lan to learn Chinese?

- (A) so that she can speak with her caretakers
- (B) so that she will feel at home in China
- (C) so that she can forget her English
- (D) so that she will like her new diet

According to Paragraph (2), where has Mei Lan been living?

- (A) in Sichuan, China
- (B) in Atlanta, Georgia
- (C) in an American research center
- (D) in the Chengdu Panda Research Center

Passage 2

Firefighter Mike مايك الإطفائي

(1) Over the roar of the fire, Mike heard Ben shout, "Hurry! The fire is almost on us!" Mike's arms were sore and tired, but he swung his axe even faster. He didn't even stop to wipe the tears from his stinging eyes. The greedy fire kept coming. The more the fire destroyed, the more it wanted. Mike worked shoulder to shoulder with the other smokejumpers to build a firebreak. His only thought was to stop the flaming monster that was raging through the forest.

(2) At last, the smokejumpers finished the firebreak. If the fire were powerful enough, it would jump over the firebreak that they had worked so hard to make. Then they would have to start all over again. Mike stood motionless, his face black with ash, his shirt wet with sweat. He was too exhausted to move because he had given all of himself to fighting the fire. He turned his head and noticed Ben watching him.

(3) Suddenly all that Ben had taught Mike about proving his bravery was clear. A man was not brave if he did something just to prove his courage. He was brave only when he forgot about himself. Today Mike had showed that he cared very much about the others with whom he was working.

According to Paragraph (2), Mike was too exhausted to move because

- (A) He had sweat all over him
- (B) He was covered with back ash
- (C) Ben did not give him much help
- (D) He had given so much to fight the fire

According to Paragraph (3), Ben taught Mike that being brave involves

- (A) working with proper tools
- (B) avoiding fire hazards
- (C) losing one's courage
- (D) caring for others

Passage 2

The pronoun his in Paragraph (3) refers to

- (A) a man
- (B) a fireman
- (C) Mike
- (D) Ben

The words the flaming monster in Paragraph (1) refer to

- (A) Ben
- (B) the fire
- (C) the burning forest
- (D) the smokejumpers

The pronoun it in Paragraph (1) refers to

- (A) the axe
- (B) the fire
- (C) the roar
- (D) the smoke

The word greedy in Paragraph 1) means wanting

- (A) more
- (B) less
- (C) some
- (D) a little

Passage 2

According to Paragraph (1) it was hard for Mike to do job because

- (A) his arms were strained and painful
- (B) he COULDN'T think very well
- (C) he was busy with other things
- (D) he DIDN'T work with others

According to Paragraph (1) Mike's only thought as he tried to put out the fire was

- (A) to please his boss
- (B) to pump more water
- (C) to stop the blazing fire
- (D) to get something to drink

According to Paragraphs (1) and (2), the smokejumpers built a to stop the fire from

- (A) fence
- (B) trench
- (C) firebreak
- (D) water line

Bees النحل

(1) The Holy Quran tells us that insects form communities Surat al-An'am, 38) and that they can communicate more than 1,400 years afterwards, has accepted that this information is indeed correct. Now, scientists in the United Kingdom are learning that some of these amazing creatures may also have feelings and emotions similar to those of humans.

(2) At Newcastle University, they are trying to discover how some insects feel. In recent years, honeybee numbers have been declining worldwide at a disturbing rate. Many explanations have been given for this. Some say the bees are dying because of disease and pesticides. Others say it may be due to pollution or microwave towers. At any rate, this is a very serious situation, for humans as well as for the bees. At least one-third of the world's crops depend on bees. Farmers are worried. What about the bees? How do they feel? Are they scared, sad or depressed?

(3) The researchers trained a group of bees to tell the difference between two smells. After one smell, they were always given a sweet sugar reward. After the other smell, they were given a bitter substance. They quickly learned to choose the smell with the sweet prize and to stick out their tongues to get it. The scientists wanted to see what the bees would do if they were put in a stressful situation. They shook up half of the bees, to make them think they were in danger. These stressed bees refused to put out their tongues for new smells, and only chose the old smell which they knew would be followed by a sweet treat. Even though there was an equal chance that a strange smell would taste good, it seemed they believed it would taste bad and were afraid to try it. These bees had become "pessimists". The other half-the unstressed bees were much more likely to try tastes from new smells, thus remaining "optimists".

(4) When humans are stressed, anxious, worried or depressed, they have lower levels of the brain hormone serotonin. So did the stressed bees. This may mean that the feelings of anxious and stressed bees are similar to those of humans with mood disorders. This knowledge, along with further investigations into bee behavior and "feelings" can hopefully be used to understand and remedy their declining numbers, for their sake and for ours.

The words these amazing creatures in Paragraph (1) refer to

- (A) bees
- (B) insects
- (C) scientists
- (D) communities

Why are bees important to humans?

- (A) They have communities and can communicate
- (B) They are necessary to produce our food crops.
- (C) They are becoming more numerous than us.
- (D) They have feelings like us.

Which paragraph describes how the scientists trained the bees?

- (A) Paragraph 1
- (B) Paragraph 2
- (C) Paragraph 3
- (D) Paragraph 4

Passage 4

Stars النجوم

(1) If we look at the night sky carefully, we will see that the stars are of many different colors. Some are red, others are yellow and some are blue. This is also shown when we take color photographs of the night sky. You can take such a photograph with an ordinary camera as long as it is kept steady. A thirty second exposure is sufficient.

(2) Astronomers have been able to classify stars according to color. They have found that blue stars are the largest and red stars the smallest. However, there are a few stars which cannot be classified in this way. These are the superstars. For example, Ryiejol is a blue superstar as big as 40,000 suns and Beetlejuice is a superstar with a size equal to 17,000 suns.

(3) Suppose an astronomer observes two stars, one brighter than the other. If neither of them is a superstar, he will know immediately that the brighter star is closer. Astronomers have instruments like light meters which can measure the brightness of a star quite accurately. It is possible to measure a star's distance from the Earth if astronomers know the color, brightness and whether or not it is a superstar.

The pronoun it in Paragraph 1 refers to the

- (A) photograph
- (B) exposure
- (C) camera
- (D) Star

The word brighter in Paragraph 3 is closest in meaning to

- (A) more colorful
- (B) more shiny
- (C) smaller
- (D) larger

Which of the following colors is NOT mentioned in the passage?

- (A) green
- (B) yellow
- (C) blue
- (D) red

Passage 5

Adam & Eric آدم و ايرك

Adam is not as tall as Eric.

The passage says that

- (A) Eric is taller
- (B) Eric is shorter
- (C) Adam is taller
- (D) Eric and adam are short

Strange substance **المادة الغريبة**

(1) A mysterious, orange, sticky gel, found on the beaches of Kivalina, a village situated on the Alaskan coast between Kotzebue and Point Hope, was recently the source of much interest. Many people thought that the sticky gel was some strange compound that had spread as a result of a chemical reaction. Others had more farfetched ideas about the substance's origins ranging from aliens to volcanic remains.

(2) Scientists at an Alaskan laboratory have been busy analyzing the unknown substance. They have concluded that it is a formation of microscopic eggs. One of the scientists said that there are traces of oil in the eggs, and this is what is causing the strange, orange color.

(3) The scientists have discovered that the eggs belong to a small invertebrate - a spineless animal, but they have not been able to identify the exact species.

According to Paragraph 1, the strange, orange substance was found

- (A) on the beaches of Kotzebue
- (B) on the beaches of Point Hope
- (C) close to a compound in Alaska
- (D) between Kotzebue and Point Hope

The word far-fetched in Paragraph 1 is closest in meaning to

- (A) difficult to believe
- (B) easy to believe
- (C) definite
- (D) clear

The word it in Paragraph 2 refers to

- (A) traces of oil
- (B) the unknown substance
- (C) a microscope
- (D) one of Alaska's laboratories

Passage 7

Ahmad أحمد

My uncle Ahmad is a physician. He helps people when they are sick. When his patients go to the office, he may ask them to breathe while he listens to their chest. Then he listens to the sound of the air in their lungs. He may have to ask them many questions and examine them to see what is making them sick. He helps people have better health.

This passage is about

- (A) university teacher
- (B) medical doctor
- (C) patient
- (D) nurse

Yazeed English

The word examine in the passage is closest in meaning to closely

- (A) talking
- (B) looking
- (C) listening
- (D) questioning

Passage 8

Ibn sina ابن سينا

(1) Husayn ibn Abdullah Ibn Sina is well known in the Arab world simply as «Ibn Sina». He is also well known in the West by the name «Avicenna» which simplifies the pronunciation. In 980 A.D. Avicenna was born in Bukhara which is now part of Russia and known as Uzbek. By the age of 10, he was already proficient in the Qur'an and Arabic classics. By the age of 16, he finished Islamic law studies, geometry, anatomy, logic and philosophy. By the age of 18, he completed the study of medicine. Soon after that, he became the Prime Minister and the physician of the Ruler of Bukhara. The Ruler was impressed by the intelligence and endurance of his Prime Minister and opened for him Library which was unique in its literary richness.

(2) Avicenna's life was extraordinarily exhausting. All day long he was busy with his patients and government work. At night, he was busy lecturing and writing books. After many years of hard work and many achievements, Avicenna died in 1037 A.D. at the age of 57.

(3) Avicenna wrote 100 treatises: 21 of them were major of which 16 were in medicine. He wrote a book in medicine named Al Qanon fi Al Tibb. It was translated into many languages. Al Qanon fi Al Tibb is an encyclopedia containing more than one million words. It consists of five volumes.

The word "proficient" in paragraph 1 is closest in meaning to

- (A) Skilled
- (B) Trained
- (C) Dedicated
- (D) Disciplined

According to paragraph 1 why does the Western world use a different name for Ibn Sina?

- (A) They did NOT like Arabic names
- (B) They did NOT want the world to know his nationality
- (C) Names change when used by speakers of a different language
- (D) He did NOT speak their language

According to Paragraph 1 Soon after Ibn Sina finished his study of medicine, he became the

- (A) traces of oil
- (B) the unknown substance
- (C) a microscope
- (D) one of Alaska's laboratories

According to Paragraph 3, Al Qanon fi Al Tibb, consists of

- (A) 5 volumes
- (B) 16 encyclopedias
- (C) 21 chapters
- (D) 100 treatises

Dopamine الدوبامين

(1) What do drug addiction and Parkinson's disease have in common? Improper levels of dopamine. This chemical acts as a messenger between brain cells. Dopamine is important for many of our daily behaviors. It plays a role in how we move, for instance, as well as what we eat, how we learn and even whether we become addicted to drugs.

(2) Chemical messengers in the brain are called neurotransmitters. They shuttle across the spaces between cells. These messengers then bind to docking-station molecules called receptors. Those receptors relay the signal carried by the neurotransmitter from one cell to its neighbor.

(3) Different neurotransmitters are made in different parts of the brain. Two main brain areas produce dopamine. One is called the substantia nigra. It's a tiny strip of tissue on either side of the base of your brain. It sits in a region known as the midbrain. Close by is the ventral tegmental area. It, too, makes dopamine.

(4) The substantia nigra is very important for movement. The term means "black substance" in Latin. And sure enough, this area of your brain is actually dark grey or black! The reason: Cells that produce dopamine also make another chemical that stains the area a dark color.

(5) These two brain areas are very thin and tiny. Together they are smaller than a postage stamp. But the dopamine they produce relays signals that travel throughout the brain. Dopamine from the substantia nigra helps us begin movements and speech.

Passage 9

What is one important idea related to the “substantia nigra” that the writer mentions in paragraphs 3 and 4?

- (A) It is in two areas of the brain
- (B) Its name comes from Latin
- (C) It makes dopamine
- (D) It sends messages

What is one important idea related to “neurotransmitters” that the writer mentions in paragraphs 1 and 2?

- (A) They can make people ill
- (B) They control levels of dopamine
- (C) They take information from cell to cell
- (D) They have an effect on people’s feelings

What does the writer want to show by the example of Parkinson’s disease?

- (A) the importance of dopamine
- (B) the importance of what we eat
- (C) the importance of neurotransmitters
- (D) the importance of avoiding using drugs

What is the main topic of the passage?

- (A) Neurotransmitters and movement
- (B) Neurotransmitters and cells
- (C) Dopamine and the brain
- (D) Dopamine and health

Passage 10

Mohammed Ali محمد علي

- (1) Muhammad Ali is a famous heavyweight boxer. He was born in Louisville, Kentucky, in the USA in 1942. His birth name was Cassius Marcellus Clay. When he was young, he was an amateur boxing champion. In 1960, when he was still an amateur, he won the light heavyweight gold medal at the Olympic games in Rome.
- (2) After that, Ali became a professional heavyweight boxer. He was 1.88 meters tall and his fighting weight was about 95 kilograms. He had a very successful professional boxing career. In fact, he won the world heavyweight championship three times. The first time was when he beat the former champion, Sonny Liston, in 1964. In the same year, he became a Muslim and assumed the name Muhammad Ali.
- (3) In 1967 he refused to be drafted for the Vietnam War. Although a jury in a trial found him guilty, later the Supreme Court said that he had had the right to refuse.
- (4) Ten years later, in 1974, he became world champion again when he beat George Foreman in Zaire. He became champion for the third time in 1978 after beating Leon Spinks. Ali fought his last professional fight in 1981 against Trevor Berbick and then retired from boxing.
- (5) Heavyweight boxers are usually very strong but not fast, but Ali was very strong and very fast. He said his style was "to float like a butterfly and sting like a bee." Ali liked to talk a lot and people called him the Louisville Lip.

According to Paragraph 1, when Ali won the gold medal, he was

- (A) a professional boxer
- (B) a heavyweight boxer
- (C) an amateur boxer
- (D) a strong boxer

The word 'assumed' in Paragraph 2 is closest in meaning to.....

- (A) took
- (B) threw
- (C) posited
- (D) suspected

According to Paragraph 3, who supported Ali when he refused to join the army?

- (A) his fans
- (B) the jury
- (C) the Vietnamese
- (D) the supreme court

According to the passage, Ali became heavyweight champion for the third time after beating

- (A) Leon Spinks
- (B) Sonny Liston
- (C) George Forman
- (D) Trevor Berbick

Kingdom's Climate **مناخ المملكة**

Strong winds will raise dust and sand, reducing visibility over the northern and central Kingdom between Makkah and Madinah, with the possibility of increasing temperatures over these regions. Suspended haze will spread over Qassim, Hail and northern parts of the Riyadh region, limiting visibility and making driving hazardous. Parts of the central and eastern Kingdom will be partly cloudy, with chances of rain. Storm clouds may form over the southwestern and Western highlands, including Abha. Baha and Taif.

Which parts of the Kingdom may receive rain?

- (A) the central and eastern parts
- (B) the central and northern parts
- (C) the northern and eastern parts
- (D) the northern and western parts

The forecast for Makkah and Medina is

- (A) clear and sunny
- (B) stormy and cool
- (C) rainy and cool
- (D) dusty and hot

Which city may expect to see storm clouds?

- (A) Makkah
- (B) Riyadh
- (C) Hail
- (D) Baha

Where will it probably be difficult to see clearly while driving?

- (A) Taif
- (B) Qassim
- (C) the western highlands
- (D) the eastern part of the Kingdom

The Korean Mother الأم الكورية

(1) Language is a way to communicate. We begin to learn language as infants and become accustomed to our native language. language therefore becomes a problem for immigrants, especially between the first and second generations. This language barrier also results in the second generation losing their identity.

(2) First generation immigrants in America suffer in lots of areas because of language difficulties. Naturally, they want their children to speak English both at home and at school in order to be more successful. This results in their children losing their ethnic identity and even more. Ignoring their parents because there is now a language between them.

(3) For example, my three children and they were all born in the States. The eighteenyears-old daughter speaks both English and Korean very well. She has no problems talking with her parents, but she does have trouble understanding Korean jokes, and there are sometimes 13 misunderstandings. The second daughter is fourteen years old and she resists speaking Korean. My aunt often gets upset with her because she is much Americanized and they cannot understand each other Even when my ant punishes her, this daughter does not understand what my aunt is talking about. I felt sympathy for my aunt whenever my fourteen-year-old cousin said, "Mom, what is your problem?"

(4) The third child is a twelve-year-old son. He speaks English to his parents and my aunt speaks Korean to him he does to the second canter. He also has a problem communicating with his parents. My tis trying to encourage him to learn both languages, but it is very bed for at because he speaks English all day and fail to understand why he should learn Korean.

(5) Immigrants try to preserve their native language in their new country while string to learn a new language. My aunt was her children to succeed in the US, but she also wants to help them understand the Korean language in order to understand the Korean heritage. The second generation often gets confused about their Identity. My aunt's children, for example, see themselves as being different from others in both places in the US they look Korean and in Korea they act like Americans. My cousins told me that when they visited Korea a few years ago, they felt different because they wore different clothes and walked differently.

(6) Language is important and valuable for any reasons. Immigrants must imagine a strong mutual understanding with the family and enable their children to appreciate the heritage. Being at ease in using both the first and second languages is important not only for attaining familial harmony, but also in helping the second generation establish the identity.

Passage 12

What is the main idea of the passage?

- (A) the importance of second language
- (B) immigrants and their education
- (C) language and identity
- (D) immigrants in the US

The word suffer in Paragraph 2 is closest in meaning to having

- (A) accidents
- (B) problems
- (C) injuries
- (D) Skills

According to Paragraph 3, which of the following is NOT TRUE about the 18-year- old daughter?

- (A) She was born in the U.S
- (B) She speaks only English very well
- (C) She sometimes misunderstands things in Korean
- (D) She communicates better with her parents than her brother and sister do

The pronoun they in Paragraph 3 refers to the mother and her

- (A) second daughter
- (B) eldest daughter
- (C) children
- (D) so

Passage 13

Cupping الحجامه

(1) Hijama, also known as “cupping”, was one of the treatments recommended by Prophet Muhammad peace be upon him). It is still practiced in some parts of the world and has many medical benefits. When Hijama is performed, small cuts are made at specific body sites, and impure blood is taken out. This blood is collected in small glass “cups”. Afterwards, the body feels refreshed and energized, having been cleansed of impurities and toxins or poisons.

(2) Hijama can sometimes offer relief where other forms of treatment or medications have failed. It is highly recommended in cases of lethargy and dullness, and for people with headaches, indigestion or sleeping problems. These complaints can be signs that the body is suffering from some form of toxicity.

(3) A qualified Hijama practitioner must use clean instruments and utensils and perform the therapy carefully and with great sensitivity. Treatment is often performed on the 17th, the 19th, or the 21st of the lunar month. When done in coordination with a healthy diet and exercise, Hijama can give long-lasting, satisfactory results. Ideally, it should be done at least once a year

Passage 13

According to Paragraph 1, what is one benefit of Hijama?

- (A) refreshed blood
- (B) an energized body
- (C) Satisfactory results
- (D) cupping blood

According to Paragraph 2, Hijama is used to treat all of the following EXCEPT.....

- (A) signs of toxicity
- (B) indigestion
- (C) lethargy
- (D) cuts on the body

According to Paragraph 2, what is the cause of some headaches?

- (A) cleansed blood
- (B) sleeping programs
- (C) toxins in the body
- (D) failed medication

According to Paragraph 3, how often should Hijama be performed on a person?

- (A) 3 days every month
- (B) once every lunar month
- (C) every other month
- (D) once a year or more

According to Paragraph 3, how often should Hijama be performed on a person?

- (A) 3 days every month
- (B) once every lunar month
- (C) every other month
- (D) once a year or more

Cancer السرطان

- (1) Cancer is a serious disease, but when a tumor is localized, it can be removed by surgery. Skin cancer, the most common form of the disease, can usually be treated this way. Melanomas, the most serious form of skin cancer, can be removed surgically, but only if spotted very early.
- (2) Other forms of treatment make use of the fact that cancer cells grow rapidly and, therefore, need to copy their DNA more quickly than do most normal cells. This makes them especially vulnerable to damage from radiation. As a result, many tumors can be effectively treated with carefully targeted beams of radiation
- (3) Medical researchers have worked for years to develop chemical compounds that would kill cancer cells, or at least slow their growth. The use of such compounds against cancer is known as chemotherapy. Great advances in chemotherapy have taken place in recent years and have even made it possible to cure some forms of cancer. However, because most chemotherapy compounds target rapidly dividing cells, they also interfere with cell division in normal, healthy cells. This produces serious side effects in many patients, and it is one of the reasons why scientists are so interested in gaining a better understanding of cell cycle proteins in cancer. The goal of many researchers is to find highly specific ways in which cancer cells can be targeted for destruction while leaving healthy cells unaffected.
- 4) Understanding and combating cancer remains a major scientific challenge, but scientists at least know where to start. Cancer is a disease of the cell cycle, and conquering cancer will require a much deeper understanding of the processes that control cell division.

Passage 14

What does paragraph 1 say about skin cancer?

- (A) It's a less frequent than other forms of cancer
- (B) It can normally be removed by surgery
- (C) People can get it from sunbathing
- (D) Melanomas are easy to notice

How can scientists avoid destroying healthy cells?

- (A) by treating cancer very early
- (B) by copying the DNA in cancer cells
- (C) by using chemotherapy or beams of radiation
- (D) by better understanding cell cycle proteins in cancer

Which word or words can we use to replace the word "therefore" in paragraph 2 ?

- (A) instead
- (B) besides
- (C) in addition
- (D) as a result

Why does the writer use the word "However" in paragraph 3 ?

- (A) to say that chemotherapy has its dangers
- (B) to give an example of how chemotherapy works
- (C) to repeat the previous sentence with fewer words
- (D) to say that the previous sentence is actually incorrect

How does the writer feel about our understanding of cancer?

- (A) He feels hopeful because scientists have made at least some progress
- (B) He feels excited because scientists are close to curing its most common forms
- (C) He feels angry because some treatments make people feel ill
- (D) He feels disappointed because few of the treatments work

Madagascar مدغشقر

(1) Madagascar is an island country located off the south eastern coast of Africa. The island is the fourth largest in the world. Only Greenland, New Guinea, and Borneo are larger. Madagascar is known as the Great Red Island for its rich, red soil. Its capital is Antananarivo.

(2) Madagascar lies in the western India Ocean. The Mozambique Channel separates the island from the African coast. The central part of Madagascar is a plateau, or high, flat land. Mountains rise above the plateau in some places. Maromokotro Peak in the north is the island's highest point. It rises 9,436 feet (2,876 meters). A narrow plain runs along the east coast. Low plateaus and plains cover the west. Rivers are short and fast flowing in the east and longer in the west. The east coast has a hot, humid tropical climate. The central plateau is cooler. The southwest is dry.

(3) Grasses cover most of the island. Some tropical forests and mangrove swamps survive on the coasts. Hundreds of different kinds of orchid also grow in Madagascar. Madagascar has many types of animals that live almost nowhere else in the world. Two examples are lemurs and fossas. Lemurs are monkeylike animals that live in trees. Fossas are catlike mammals that hunt birds and lemurs. Many butterflies, chameleons, and crocodiles also live in the country.

(4) Madagascar's people are known as the Malagasy. The Malagasy are more closely related to Indonesians than to Africans, even though the country is closer to Africa than to Indonesia. The Malagasy are divided into about 20 groups. The Merina make up the largest group. The country also has small groups of people from Africa, Asia, France, and the nearby island country of Comoros. Many people of Madagascar speak both the Malagasy and French languages. About half of the people are Christian, and most of the rest follow traditional Malagasy religions. Fewer than one-third of the people live in cities. Almost all the major cities and towns are in the east.

(5) Madagascar is a poor country. Most of the people live by growing crops and by raising humped cattle called zebu. Rice is the main food crop. Farmers grow vanilla and cloves to sell to other countries. Vanilla from Madagascar is thought to be the best in the world. Madagascar also produces coffee, sugar, and shrimp. Madagascar's small industries make mainly cloth, clothing, cement, soap, beer, and cigarettes. Mines provide cobalt, chromite, graphite, gold, and gems. Cobalt is the main product. The country's share of world cobalt sales was nearly 4% in 1980.

(6) People first came to Madagascar from Indonesia more than 1,100 years ago. Arab sailors arrived on the island in AD 1000. The Portuguese first came to Madagascar in 1500, and the French arrived and set up small towns so they could trade in the 1600s. The Malagasy Merina kingdom controlled much of the island in the early 1800s. The French defeated the Merina in 1895. France then ruled the island as a colony. The island became the independent Malagasy Republic in 1960. In the 1970s, the country's army took power. The country took the name Madagascar in 1975. In 1992, Madagascar held free elections for the first time in 17 years. The new government is working to improve the economy.

What is the main food crop in Madagascar?

- (A) cobalt
- (B) potatoes
- (C) tea
- (D) rice

When did Arab sailors first arrive in Madagascar?

- (A) 1000
- (B) 1100
- (C) 1500
- (D) 1600

When did the country take the name Madagascar?

- (A) 1970
- (B) 1975
- (C) 1980
- (D) 1992

Singapore سنغافورة

(1) Though physically small, Singapore is an economic giant. It has been Southeast Asia's most modern city for over a century. The city blends Malay, Chinese, Arab, Indian and English cultures and religions. Its unique ethnic tapestry affords visitors a wide array of sightseeing and culinary opportunities from which to choose. A full calendar of traditional festivals and holidays celebrated throughout the year adds to its cultural appeal. In addition, Singapore offers luxury hotels, delectable cuisine and great shopping! The island nation of the Republic of Singapore lies one degree north of the Equator in Southern Asia. The country includes the island of Singapore and 58 or so smaller islands. Because of its efficient and determined government, Singapore has become a flourishing country that excels in trade and tourism and is a model to developing nations. The capital city, also called Singapore, covers about a third of the area of the main island.

(2) Located at the tip of the Malay Peninsula, Singapore's tropical climate welcomes both leisure and business travelers year-round. The island republic's excellent infrastructure enables visitors to enjoy its many sites and attractions in a safe, clean and green environment. Award winning Changi Airport provides airlinks to major cities around the world. The train and subway systems are clean, fast and efficient. In addition, its state-of-the-art cruise terminal has established Singapore as one of the premier cruising centers of South East Asia and an exciting port of call on any Asian cruise itinerary.

(3) In the city, there is no need for a car. Public transportation is excellent and walking is a good way to explore the city. All major attractions are also accessible by tour bus. Since the city is only 60 miles (100k) from the equator, the tropical temperatures do not vary much. Rainfall is fairly evenly distributed through the year. No matter when you choose to visit, warm weather will be abundantly available. The visitor is struck immediately by Singapore's abundance of parks, nature reserves, and lush, tropical greenery.

(4) Singapore's progress over the past three decades has been remarkable, yet the island has not been overwhelmed by development. Visitors will discover a wealth of historical treasures from the past, in the beauty of older buildings, values and traditions that have survived in the face of profound social and geographical change.

(5) Lacking any noteworthy natural resources, Singapore's early prosperity was based on a vigorous free trade policy, put in place in 1819 when Sir Stamford Raffles first established it as a British trading post. Later, mass industrialization bolstered the economy, and today the state boasts the world's second busiest port after Rotterdam, minimal unemployment, and a super-efficient infrastructure. almost the entire population lives in upscale new apartments, and the average per capita income is over US\$12,000. Singapore is a clean, safe place to visit, its amenities are second to none and its public places are smoke-free and hygienic.

Passage 16

- (6) Forming the core of downtown Singapore is the Colonial District. Each surrounding enclave has its own distinct flavor, from the aromatic spice stores of Little India, to the tumbledown backstreets of Chinatown, where it is still possible to find calligraphers and fortune tellers, or the Arab Quarter, whose cluttered stores sell fine cloths and silks.
- (7) North of the city, are two nature preserves, Bukit Timah and the Central Catchment Area, along with the splendid Singapore Zoological Gardens. The east coast features good seafood restaurants set on long stretches of sandy beach. In addition, there are over fifty islands and islets within Singaporean waters, all of which can be reached with varying degrees of ease. Day trips are popular to Sentosa, the island amusement arcade which is linked to the south coast by a short causeway and cable car. Music, theater, nightlife: all are abundant in this remarkable city. Singapore used to be considered a "stop over" on the way to larger Asian cities. This is no longer true! Visitors seek out Singapore for business and finance and also for a fascinating and satisfying vacation for the whole family.
- (8) Singapore is both an island and a country, but perhaps its best description is that of city-state. Like the great city-states of the past, it offers civilization and order in the highest degree. Its combination of Western-style development and Eastern style calm seems to present the best of both hemispheres: It's a modern metropolis where you feel safe walking the streets, and it's an Asian business center that's a model of efficiency. Singapore is also a multicultural city, and close to one-quarter of its population are expatriates or foreign workers from all over the world. Known for its desire to become the technology hub of Asia, Singapore is the most wired country in the region.
- (9) Singapore shares another trait with historical city-states: Its authorities strongly believe that they can safeguard the status quo with regulations against almost anything and everything that - in their view - could possibly upset the sense of tranquility. In reality, visitors will find the place is not as restrictive as the long lists of hefty fines for such things as littering and jaywalking suggest. Some visitors to Singapore leave singing the praises of a society that "works," while others feel the government's near-compulsive fixation on cleanliness and order makes Singapore sterile in every sense of the word.

Passage 16

In what two areas is Singapore a successful country?

- (A) management of natural resources and trade
- (B) architecture and public transport
- (C) business and finance
- (D) trade and tourism

What two attractions are found north of the city of Singapore?

- (A) Singapore Zoological Gardens and the Arab Quarter
- (B) Bukit Timah and the Central Catchment Area
- (C) Timah Sentosa and the Colonial District
- (D) Little India and Bukit

In the early days, what helped strengthen Singapore's economy?

- (A) a strong trade policy and industrial development
- (B) low unemployment and a free trade policy
- (C) natural resources and a busy trading port
- (D) tourism and industrial development

Tourism in Jamaica السياحة في جامايكا

(1) Tourism has become an increasingly important part of Jamaica's economy in recent decades. Tourism has improved the country's economy and increased its employment. It has also brought many opportunities to Jamaica's population. For example, in 2012 tourism provided almost \$1.3 billion to Jamaica's economy.

(2) The income from tourism plays a major part in helping Jamaica's government to fund economic and social policies. The government has used the taxes from tourism to support special programs in education and health care. Tourism has also helped the country to improve its infrastructure or the basic system that a country needs to work properly. One example of this is that Jamaica began to develop its roads and airports, which tourists use during their visit to the country.

Yazeed English

3) Along with developing the country's infrastructure, Jamaica has also started to protect some of its valuable natural resources. One example is that the country began to identify and protect its national parks and beaches. Now visitors must pay entry fees to visit these parks, which help to provide money to keep the parks protected. The government also works to keep the parks and beaches free from pollution and trash. These government policies have had a positive effect on tourism because tourists are able to have a better experience when they visit these places.

4) Jamaica continues to rely heavily on tourism for its economy. However, one of the disadvantages of tourism in the country is the rainy season, which extends from May to November. During this time, 25% of the hotel workers lose their jobs because there are very few tourists. This has had a negative effect on the lives of the people who work in the tourism industry in the country.

Passage 17

What did tourism lead to in Jamaica?

- (A) entry fees to parks
- (B) increases in the prices of houses
- (C) \$1.3 billion added to the economy
- (D) unemployment of 25% of hotel employees

What happened to workers that depended on tourism?

- (A) They receive better wages and more leisure time
- (B) They receive better health benefits from their employers
- (C) They pay taxes that are used to improve roads and airports
- (D) They are unemployed for seven months when there are few tourists

The word "major" in paragraph 2 is closest in meaning to

- (A) important
- (B) basic
- (C) tiny
- (D) secondary

The word "identify" in paragraph 3 is closest in meaning to

- (A) name
- (B) destroy
- (C) relax
- (D) sell

الورق البردي Papyrus

(1) The paper we use today is made by machine. Trees are cut up and processed into a mixture called wood pulp. The pulp, containing tiny cellulose fibers, is pressed and rolled out to form sheets of paper.

(2) The first manmade writing material was not paper. About 4,000 years ago, the ancient Egyptians took the fibrous stems of the papyrus plant, flattened them, laid them crosswise and pressed them down to stick them together. When dried, this made a piece of papyrus that could be written on.

(3) Paper was first made in China around the year 105 CE by a man called Ts'ailun. He found a way to make paper from the stringy inner bark of the mulberry tree. The bark was pounded in water to separate the fibers. This mixture was then poured into a bamboo tray to let the water drain out. After that, the soft mat of paper was moved onto a smooth, flat surface to dry. Later, someone discovered that the paper could be improved by brushing it with starch to make it stronger.

(4) Chinese traders travelled around Asia as far as Samarkand. There, they met with Arab merchants who learned the secret of making paper and took it to Spain. Afterwards, the art of papermaking spread throughout the rest of Europe.

(5) Since then, many kinds of machines have been invented and improved methods discovered for making paper. One of the most important, for example, was a machine developed in France in 1798. This machine could make a continuous sheet or web of paper. Before, paper could only be produced in separate sheets.

Passage 18

The word them in Paragraph 2 refers to

- (A) Ancient Egyptians
- (B) writing materials
- (C) papyrus stems
- (D) paper

According to passage, the first real paper was made in

- (A) Egypt
- (B) China
- (C) France
- (D) Samarkand

According to the passage, who introduced the paper-making process to Europe?

- (A) Ts'ailun
- (B) Chinese traders
- (C) the Arabs
- (D) the Spanish

Which component is necessary for making both paper and papyrus?

- (A) tree bark
- (B) tree wood
- (C) plant starch
- (D) fibrous material

تلوث الهواء Air pollution

(1) Air is the ocean we breathe. It supplies us with oxygen which is essential for our bodies. Air is made up of a mixture of nitrogen, Oxygen, water vapor and inert gases. Human activities release substances into the air and some of these can cause problems for humans, Plants and animals. These Problems are usually referred to as air pollution.

(2) There are several problems that result from air pollution. The main ones we usually hear about are smog, acid rain, the greenhouse effect and "holes" in the ozone layer. Each of these problems has serious implications for our health and well-being as well as for the environment as a whole. On farms wages are low, working conditions are poor and farmers use enormous quantities of pesticides and precious water. This is the central contradiction of California agriculture.

(3) The release of particles into the air from burning fuel for energy is often discussed as a huge problem. Diesel smoke is a good example of the particulate matter that results in this pollution. The particles are very small pieces of matter measuring about 2.5 microns or 0.0001 centimeter. This type of pollution is sometimes referred to as "Black Carbon" pollution. The exhaust from burning fuels in automobiles, homes, and industries is a major source of pollution in the air. Authorities also believe that the burning of the wood and charcoal in fireplaces and barbeques release significant quantities of soot into the air.

(4) Another type of pollution is the release of noxious gases, such as sulfur dioxide, carbon monoxide, nitrogen oxides, as well as chemical vapors. These take part in chemical reactions once they are in the atmosphere, resulting in smog and acid rain.

(5) We must also consider air pollution inside our homes, offices, and schools. Some pollutants are created by indoor activities such as smoking and cooking. Most people spend about 80- 90% of their time inside buildings. That means our exposure to harmful indoor pollutants can be serious. It is therefore important to consider both indoor and outdoor air pollutions.

Passage 19

According to Paragraph 1, which of the following are constituents of air?

- (A) nitrogen and water vapor, but NOT oxygen
- (B) nitrogen and oxygen, but NOT water vapor
- (C) nitrogen, oxygen and water vapor
- (D) nitrogen, oxygen, and fuel

The word essential in Paragraph 1, is closest in meaning to

- (A) healthy
- (B) important
- (C) dispensable
- (D) comprehensive

What is a good example of particles released into the air that are a source of pollution?

- (A) indoor pollution
- (B) human activity
- (C) diesel smoke
- (D) acid rain

What is pollution resulting from diesel smoke called?

- (A) black carbon
- (B) burning fuel
- (C) exhaust
- (D) micron

Indoor air pollution can be more serious than outdoor pollution because people_____.

- (A) spend most of their time in buildings
- (B) often burn charcoal for cooking
- (C) sleep, smoke and cook indoors
- (D) often burn wood for heating

ديترويت Detroit

(1) Detroit was once America's fourth largest city. The city's population increased from about 300,000 in 1900 to 1.8 million in 1950 as the city attracted many workers to work in its car factories. In 1960, it had the highest income per person in the USA. Today, however, more than 40,000 buildings are vacant or not used and property prices have fallen by more than 80%.

(2) Between 1900 and 1950, Detroit had a growing economy. The American car companies, General Motors, Ford, and Chrysler were all located in Detroit, and they manufactured the majority of the cars sold in the US. However, as international competition increased and American car sales decreased, many people lost their jobs in Detroit's car factories. The city had relied too much on one industry. As a result, when the car industry suffered, it also had a negative effect on Detroit's economy. Reduced car sales also meant that there would be less tax money from the city's car companies, which decreased the city's already low government budget.

(3) As the city's car industry became weaker, the number of jobs in the city decreased and unemployment reached 30% by 2013. Over 60% of Detroit's population who work now, do so outside the city. However, there is some hope. Urban farms are appearing in the city. Young people - especially artists and musicians - are moving into Detroit to make use of cheap city spaces. The city is also creating new policies, such as low rents and tax cuts, in order to help attract new businesses back into the city.

What was the reason for low rents and tax cuts?

- (A) to create urban farms
- (B) to bring companies to Detroit
- (C) to help artists and musicians
- (D) to make life easier for the poor

The word "vacant" in paragraph 1, is closest in meaning to

- (A) empty
- (B) for sale
- (C) destroyed
- (D) being built

Aggression in Children عدوانية الأطفال

(1) Most parents do not enjoy watching their children misbehave. Bad behavior by children often results in bad behavior by parents. The first idea that has to go is that poor parenting is what makes children misbehave or behave badly. The cause of the child's behavior may lie in psychological problems; it may even lie in the biology of the child. Whatever the reason, the important issue is how parents respond when children act out.

(2) Aggressive behavior starts early in children's lives. A study looked at children 6 to 24 months of age. Mothers reported how often their children acted out, or displayed poor behavior. They cited kicking, hitting, pulling hair, biting and even hurting animals. The most common actions were hitting or smacking another person. The least common action was hurting animals. Hitting someone peaked at 18 months when eight of 10 kids were hitting and smacking other people. Kicking, pushing and throwing things peaked at 20 months. The "terrible twos" started before the age two.

(3) Pediatricians can assure parents that these behaviors are normal in small children. The big job is to guide parents on how to deal with their children when they behave this way. From the start, parents should set limits. They need to respond in ways that may help redirect or distract a child. This would help a child go from misbehaving to a more positive behavior. Pediatricians believe these approaches work. It seems certain that positive responses such as these are better than anger or punishment.

(4) The frequency, intensity, and length of the bad behavior are also important. There are some questions that parents must also consider. Does the child have any issues that he or she is dealing with? Does the child have friends? Some children may show signs of depression when they have had a negative experience. The answers to these questions may explain why the child is acting out.

(5) Parents often use their instincts in dealing with their children without considering what is causing the misbehavior. They may respond with anger, threats, and punishment. A better way is to plan in order to avoid potential conflicts. For example, if getting ready for school is a problem, parents can come up with ways to make it easier. This would help them to avoid potential problems before they start.

Passage 21

What word other than "misbehave" does the writer use for aggressive behavior?

- (A) act out
- (B) avoid
- (C) distract
- (D) deal with

Which of the following is a fact?

- (A) Poor parenting is the cause of children's misbehavior
- (B) Aggressive behavior is normal in young children
- (C) Parents often deal with children's bad behavior well
- (D) Hunting animals is the most common aggressive behavior among children

How is the writer's view about children's bad behavior different from the parent's view?

- (A) The writer believes that parents should plan to avoid bad behavior
- (B) The writer believes that parents should use their instincts to deal with bad behavior
- (C) The writer believes that parents should respond to bad behavior with threats and punishment
- (D) The writer believes that parents should ignore bad behavior

What can we understand about parents from Paragraph (3)?

- (A) Parents understand that children's bad behavior is normal
- (B) Parents avoid being angry with or yelling at children
- (C) Parents reward bad behavior
- (D) Parents fail to deal with children's bad behavior appropriately

What can we understand about parents in Paragraph (5)?

- (A) Parents fail to prevent children's bad behavior
- (B) Parents blame their children's friends for bad behavior
- (C) Parents consider the causes of children's bad behavior
- (D) Parents think schools should deal with children's bad behavior

Reading

Passage 22

رسم بياني عن القهوة US Coffee Consumption

According to the graph, how many gallons of coffee did people drink in 1950?

- (A) around 50
- (B) around 40
- (C) around 30
- (D) around 20

According to the graph, in what year was coffee drinking the lowest in the U.S?

- (A) 1945
- (B) 1960
- (C) 1995
- (D) 2000

رسم بياني عن المواصلات Transportation

Modes of Transportation to Work, Ontario, 2016

Source: Statistics Canada

What percentage of people went to work by car?

- (A) 65.6
- (B) 12.3
- (C) 8
- (D) 1

What percentage of people travelled by foot?

- (A) 1
- (B) 1.2
- (C) 4.5
- (D) 5.3

Strawberry الفراولة

(1) Agricultural abundance is a pillar of the California dream. In 2016 the state turned out more than \$45 billion worth of meat, milk and crops. Long before nutritionists agreed that fresh fruits and vegetables should be the center of American diets, California farmers had planted much of their land in these products, and today they produce half of the nation's fruits, vegetables and nuts.

(2) But although fruits and vegetables are vaunted as healthy foods, their impact as crops is quite different. On many California produce farms wages are low, working conditions are poor and farmers use enormous quantities of pesticides and precious water. This is the central contradiction of California agriculture

(3) California's strawberry industry is the state's sixth most important commodity in terms of the value of crops sold. Strawberries are attractive reasonably nutritious and occasionally tasty fruits and can be grown and eaten within California nearly yearround. But the industry's growth has relied on heavy use of toxic chemicals and now growers face heightened restrictions on some of their most favored chemicals: soil fumigants.

(4) Unfortunately, less toxic or non-chemical strategies that would allow strawberries to be grown for a mass market, maintaining affordable prices, are elusive and likely to remain so.

(5) Although strawberry production once was scattered throughout the state, by the 1960s, it had concentrated in coastal zones to take advantage of sandy soils and mild temperatures. Thereafter, the industry saw tremendous growth in productivity. In Monterey and Santa Cruz counties alone, acreage more than tripled and production increased tenfold from 1960 to 2014. Much of this growth was enabled by advances in plant breeding and use of plastic tarps to absorb heat, allowing growers to increase the length of strawberry seasons.

(6) But the main driver of growth has been the use of pre plant chemical fumigants. Growers hire pest control companies to fumigate soils before planting strawberries in order to kill soil-borne pests most importantly, plant pathogens such as *Verticillium dahliae* and *Macrophomina phaseolina*. Without such treatment, these pathogens cause strawberry plants to wilt and die.

Passage 24

(7) Now, however, the industry's fumigant of choice methyl bromide can no longer be used in strawberry fruit production. In 1991 methyl bromide was banned under the Montreal Protocol on Substances that used in nursery production to ensure that starter plants are virus- and pathogen-free. One potential replacement, methyl iodide, was approved for use in late 2010. But it was withdrawn from the market in 2012, following an activist campaign and lawsuit that accused California regulators of performing an inadequate review of potential health risks to workers and the general public. Among other things, the chemical is a known neurotoxin and carcinogen.

(8) Other fumigants are still allowed, but their use is increasingly restricted by buffer zones and township quotas. Consequently, growers are contending with heightened levels of plant disease, some from pathogens that had never before been evident in California strawberry fields.

(9) Can California find a less toxic way to raise 90 percent of the nation's fresh strawberries? Although the strawberry industry is investing significant resources into non-chemical alternatives to manage soil-borne disease, the obstacles are formidable. The entire production system, including reliance on fumigants, is embedded into the cost of land.

(10) Fumigation has allowed growers to plant on the same blocks of land. year after year, and not worry about soil disease. With fumigation available to control.

(11) Together these innovations have allowed growers to keep prime strawberry land in production every year for much of the year, yielding exceptional amounts of fruit. High land prices reflect these expectations and make it unprofitable to grow strawberries using less intensive methods. The Pacific Ocean's natural summer air-conditioning is attractive to suburbanites as well as strawberries, so coastal development is putting additional pressure on the cost of strawberry land while at the same time increasing public pressure to control use of fumigants.

(12) Informed and concerned consumers ingrained with California's deep culture of environmentalism have turned to organic strawberries, which they see as a more sustainable option. As conventional growers took note of this vibrant market, organic strawberry production rose fivefold between 2000 and 2012, to reach about 3,300 acres planted in 2017, which represents 12 percent of all strawberry acreage.

Passage 24

(13) But although organic growers use non-chemical soil fumigation methods or rotate strawberries with crops that have a mild disease-suppressing effect, such as broccoli, few of them fundamentally alter the production system in other ways.

(14) A small but dedicated set of growers have learned how to raise strawberries for the long haul without fumigants. However, even they use starter plants produced on fumigated soil, since no nurseries produce organic plants. Crucially, for these growers strawberries are a minor crop in what are otherwise highly diversified systems. And most of these producers are located outside of prime strawberry growing regions, where land is cheaper. Their approach therefore is not nearly replicable for growers producing for the mass market.

(15) These exceptions tell us as much about the limits of California strawberry production as does mainstream production. Consumers who want organic strawberries must be willing to live with compromises, pay premium prices. For others, the dream of affordable year-round strawberries grown without toxic chemicals is already an impossible one.

What are two plant pathogens that harm strawberries?

- (A) verticillium dahliae and macrophomina phaseolina
- (B) methyl bromide and methyl iodide
- (C) methyl iodide and macrophomina phaseolina
- (D) verticillium dahliae and methyl bromide

Between which years did organic strawberry production rise by fivefold?

- (A) 1960 and 2014
- (B) 2005 and 2015
- (C) 2010 and 2012
- (D) 2000 and 2012

Stress التوتر

(1) We all feel stressed from time to time - it's all part of the emotional ups and downs of life. Stress has many sources. It can come from our environment, from our bodies, or our own thoughts and how we view the world around us. It is very natural to feel stressed around moments of pressure such as exam time - but we are physiologically designed to deal with stress and react to it.

(2) When we feel under pressure the nervous system instructs our bodies to release stress hormones including adrenaline, noradrenaline and cortisol. These produce physiological changes to help us cope with the threat or danger we see to be upon us. This is called the "stress response" or the "fight-or-flight" response.

(3) Stress can actually be positive, as the stress response helps us stay alert, motivated and focused on the task at hand. Usually, when the pressure subsides, the body rebalances and we start to feel calm again. But when we experience stress too often or for too long, or when the negative feelings overwhelm our ability to cope, then problems will arise. Continuous activation of the nervous system - experiencing the "stress response" - causes wear and tear on the body.

(4) When we are stressed, the respiratory system is immediately affected. We tend to breathe harder and more quickly in an effort to quickly distribute oxygenic blood around our body. Although this is not an issue for most of us, it could be a problem for people with asthma who may feel short of breath and struggle to take in enough oxygen. It can also cause quick and shallow breathing, where minimal air is taken in, which can lead to hyperventilation. This is more likely if someone is prone to anxiety and panic attacks.

(5) Stress wreaks havoc on our immune systems. Cortisol released in our bodies suppresses the immune system and inflammatory pathways, and we become more susceptible to infections and chronic inflammatory conditions. Our ability to fight off illness is reduced.

(6) The musculoskeletal system is also affected. Our muscles tense up, which is the body's natural way of protecting ourselves from injury and pain. Repeated muscle tension can cause bodily aches and pains, and when it occurs in the shoulders, neck and head it may result in tension headaches and migraines.

(7) There are cardiovascular effects. When stress is acute (in the moment), heart rate and blood pressure increase, but they return to normal once the acute stress has passed. If acute stress is repeatedly experienced, or if stress becomes chronic (over a long period of time, it can cause damage to blood vessels and arteries. This increases the risk for hypertension, heart attack or stroke.

(8) Stress has marked effects on our emotional well-being. It is normal to experience high and low moods in our daily lives, but when we are stressed, we may feel more tired, have mood swings or feel more irritable than usual. Stress causes hyperarousal, which means we may have difficulty falling or staying asleep and experience restless nights. This impairs concentration, attention, learning and memory, all of which are particularly important around exam time. Researchers have linked poor sleep to chronic health problems, depression and even obesity.

(9) The way that we cope with stress has an additional indirect effect on our health. Under pressure, people may adopt more harmful habits such as smoking to relieve stress. But these behaviors are inappropriate ways to adapt and only lead to more health problems and risks to our personal safety and well-being.

(10) So learn to manage your stress, before it manages you. It's all about keeping it in check. Some stress in life is normal - and a little stress can help us to feel alert, motivated, focused, energetic and even excited. Take positive actions to channel this energy effectively and you may find yourself performing better, achieving more and feeling good.

Where can stress come from?

- (A) time
- (B) emotions
- (C) our thoughts
- (D) the stress response

What positive effects can stress have?

- (A) feeling calm
- (B) staying alert
- (C) better hearing
- (D) quick breathing

What can cause bodily aches and pains?

- (A) sport
- (B) cortisol
- (C) muscle tension
- (D) the immune system

According to the passage, what harmful habits may people adopt under pressure?

- (A) sleeping poorly
- (B) gaining weight
- (C) fighting
- (D) smoking

Pizza البيتزا

(1) Pizza, which originated in Italy. Is a fast food that is known and loved all around the world. How did it become so popular? Part of the reason is that tourists who went to Italy ate it there and loved it. When they returned to their countries, They looked for Italian restaurants that might have it. But much more significant in pizza becoming popular worldwide that fact that lots of American soldiers who were in Italy during World War II ate it there and then wanted it when they returned to the USA.

This dramatic increase in the demand for pizza in the 1950s led to the development of special restaurants for pizza.

(2) A shaky pizza parlor opened in California in 1954 which led to the first pizza restaurant chain that spread throughout the USA and even to other countries. Soon after that, in 1958, Two young men opened a Pizza Hut in Kanas. Now there are Pizza Huts all over the world. Other Pizza restaurants chains soon developed. For example. Domino's Pizza can be found all over the world. Papa John's Pizza has also become quite popular. This ever growing demand for pizza led to a market for ready-to-bake frozen pizzas in supermarkets. Now pizzas can easily be enjoyed not only in restaurants.

But also at home and even in school and hospital cafeterias.

(3) Pizza is a kind of dish that can adapt well in different societies. The ingredients for pizza can change to fit the taste and desires of a particular culture. The key reason enabling it to gain worldwide popularity. Vegetarians – there are many in India and other countries – can simply ask for vegetables only on a pizza. Beef, Pork, Lamb, or goat – the choice of meat differs from country to country – can be used. Those who like spicy food can add their favorite spices. Dessert pizzas are readily available with or without fruit. Seafood? No problem. Add to this variety of ingredients the different styles of pizza: deep dish, thin crust, stuffed crust, and the result is a dish that is adaptable to everyone's taste.

(4) While pizza is not exactly a health food since it tends to be high in calories. It can in fact contain a decent amount of vitamins and minerals due to the wide range of possible ingredients. Pizza can therefore be nutritious. All of these factors help explain the worldwide popularity of pizza.

The word there in paragraph 1 refers to.....

- (A) the united states
- (B) a pizza restaurant
- (C) Italy
- (D) the world

According to paragraph (2), the first pizza parlor opened in

- (A) 1954 in California
- (B) 1954 in Kansas
- (C) 1958 in California
- (D) 1958 in Kansas

According to paragraph (2), supermarkets began to offer frozen pizzas because they

- (A) Are healthier than other pizzas
- (B) Contain a variety of ingredients
- (C) Wanted to compete with restaurants
- (D) Wanted to meet the increased demand

According to paragraph (3), the main reason for pizzas becoming popular worldwide is their ability to

- (A) Adapt to different cultures
- (B) Appeal to vegetarians
- (C) Have different crusts
- (D) NOT to spoil quickly

According to paragraph (4) Pizza can have a fair amount of vitamins and minerals because it has.....

- (A) A variety of ingredients
- (B) A lot of cheese
- (C) Crunchy crust
- (D) Different styles

According to paragraph (4), Pizza is NOT a good example of a health food because it is

- (A) Low in fat
- (B) High in calories
- (C) Short of carbohydrates
- (D) Short of grains

What is the best title for the passage?

- (A) Pizza Hut
- (B) Preparing Pizza
- (C) The Popularity of Pizza
- (D) How Pizza Came to America

Tuna and salmon التونة والسلمون

(1) Some estimates report the world's oceans are home to 20,000 species of fish. Ocean fish come in all shapes, sizes, and colors and live in drastically different depths and temperatures. Two of the most commonly known fish are tuna and salmon.

(2) Salmon are fish that are known for making long, difficult journeys in order to breed. Salmon belongs to the scientific family Salmonidae, which also includes trout. There is one species, or type, of Atlantic salmon. There are six species of Pacific salmon: coho, chum, king, pink, sockeye, and cherry.

(3) Tuna are large fish that live in most parts of the world's oceans. They belong to the same family of fish as mackerel. Tuna is one of the most popular foods that comes from the sea. Most of the tuna that fishers catch is canned. There are seven different species, or types, of tuna: bluefin, albacore, yellowfin, bigeye, blackfin, longtail, and southern bluefin. The skipjack tuna is related to these species, but it belongs to a separate group of fish.

(4) The Atlantic salmon lives mainly in the North Atlantic Ocean. It breeds in the rivers of North America and Europe. Pacific salmon are found in the waters of the North Pacific. They breed in rivers near both the North American and Asian coasts.

(5) Salmon come in a range of sizes. The Atlantic salmon weighs about 12 pounds (5.5 kilograms). The pink salmon usually weighs 3 to 6 pounds (1.4 to 2.7 kilograms). The king salmon may weigh 25 pounds (11 kilograms) or more. While in the ocean, salmon have a silver color and spots on their back and fins. During the breeding season, they undergo changes in color that vary by species.

(6) A tuna has a long, rounded body. It is usually dark on top and silvery underneath. Some species have spots or stripes. Unlike other types of fish, a tuna can keep its body warmer than the temperature of the surrounding water. Many species of tuna are about 35 inches (90 centimeters) long. The bluefin tuna is the largest species. It can grow as long as 14 feet (4 meters) and weigh up to 1,800 pounds (800 kilograms).

Passage 27

(7) After being born in fresh water, salmon travel to the ocean. They live there for one to three years. Then they travel back to where they hatched in order to breed. For some salmon, this can mean a trip of more than 2,000 miles (3,200 kilometers). Salmon may leap over waterfalls and cut through churning rapids to reach their home waters again. Once in fresh water, salmon stop eating and live off their body fat. The males fight for a mate. After a male and a female are paired, the female digs a pit and lays thousands of eggs. Most Pacific salmon die shortly after mating. Many Atlantic salmon, however, return to the sea and may breed again.

(8) Tuna travel in large groups called schools. Some species travel long distances. Tuna feed on other fish, including herring, menhaden, and mackerel. Some species also eat small, spineless animals such as squid. Some types of tuna return to the waters where they hatched to spawn, or produce eggs.

How many types of Atlantic salmon are there?

- (A) one
- (B) six
- (C) seven
- (D) ten

How much does the Atlantic Salmon usually weigh?

- (A) 25 pounds
- (B) 12 pounds
- (C) 10 pounds
- (D) 6 pounds

Which of the following is the largest species of tuna?

- (A) the yellowfin tuna
- (B) the longtail tuna
- (C) the black tuna
- (D) the bluefin tuna

الدمية الروسية Russian doll

(1) A matryoshka doll refers to a set of dolls of decreasing word size placed one inside the other, The word a diminutive form of the Russian female first name 3 "atryoshka", "Matryona". The first doll set in Russia was carved in 1890 by Vasily Zvyozdochkin from a design by Sergey vr.q8b52@gmail.com 6 Malyutin, who was a folk crafts painter. Traditionally the outer layer is a woman, dressed in a sarafan, a long traditional Russian dress.

(2) A set of matryoshkas consists of a wooden figure which separates, top from bottom, to reveal a smaller figure of the same sort inside, which has, in turn, another figure inside of it, and so on. The number of nested figures is traditionally not less than five, but can be much more, up to several dozen with sufficiently fine craftsmanship. Modern dolls often yield an odd number of figures but this is not an absolute rule; the fine craftsmanship. Modern dolls often yield an odd number of figures but this is not an absolute rule; the original set, for instance, had an even number. The form is approximately cylindrical, with a rounded to be for the head, tapering toward the bottom.

(3) It is believed Zvyozdochkin and Malyutin were inspired as no protruding features by a doll from Honshu, the main island of Japan. Sources differ in their descriptions, describing either a round, hollow doll or a nesting doll, portraying a bald old Buddhist monk.

(4) Zvyozdochkin's creations were first presented at the Exposition Universal in the year 1900 in Paris, where the toy earned a bronze medal. Soon after, matryoshka dolls were being made in several places in Russia and shipped around the world including to Europe, Asia and America.

(5) Matryoshka dolls are often designed to follow a particular theme, and during Perestroika, the leaders of the Soviet Union became a common theme of matryoshkas. In one such example, the largest, outside figure was that of Mikhail Gorbachev, followed by Leonid Brezhnev Yuri Andropov and Konstantin Chernenko almost never appear due to the short length of them of their respective terms), Nikita Khrushchev, Joseph Stalin and finally the smallest, Vladimir Lenin.

The best title for this passage is

- (A) Arts and Crafts
- (B) Children's Toys
- (C) Modern Handicrafts
- (D) Russian Wood figurines

The purpose of Paragraph 1 is to.....

- (A) describe traditional Russian clothes
- (B) describe the origin and appearance of the dolls in Russia
- (C) provide a profile of Zvyozdochkin and Malyutin
- (D) provide an explanation of the Russian name Matryona

The word carved in Paragraph 1 is closest in meaning to

- (A) sourced
- (B) planned
- (C) shaped
- (D) copied

According to Part 2, what is required for a set to have a large number of nesting dolls?

- (A) wooden figures
- (B) expert workmen
- (C) cylindrical form
- (D) NO protruding features

The word this in Paragraph 2, refers to

- (A) modern dolls
- (B) several dozen
- (C) absolute rule
- (D) odd numbers

According to Paragraph 3, the idea of nesting dolls most likely started in

- (A) Paris
- (B) Japan
- (C) Russia
- (D) America

According to Paragraph 5), some rulers are excluded from being made into dolls because they

- (A) sourced
- (B) planned
- (C) shaped
- (D) copied

Emotions المشاعر

(1) What comes to mind when you think of emotions? It's probably happiness, sadness, or fear. Emotions such as happiness, anger, sadness, and fear are important emotions, but human emotional experience is vast which means that people are capable of experiencing a wide variety of feelings

(2) Let's consider what emotions do and when emotions happen. According to functionalist theories of emotion, emotions help people manage important tasks. Fear, for example, prepares the body to fight or flee; happiness rewards achieving goals and builds attachments to other people, but what causes emotions to happen in the first place? Although it usually feels like something in the world causes an emotion, such as a good hug, emotion theories argue that emotions most likely come from how we think about what is happening in the world, not what is really happening. After all, if things in the world directly caused emotions, everyone would always have the same emotion in response to something. Interest, for example, may motivate a person to learn something new, whereas it may not create a response in someone else.

(3) For instance, appraisal theories propose that each emotion is caused by a group of appraisals, which are evaluations and judgments of what events in the world mean for our goals and well-being. We ask ourselves, is this relevant to me? Does it further or obstruct my goals? Can I deal with it or do something about it? Did someone do it on purpose? Different emotions come from different answers to these appraisal questions.

(4) In general, emotions play important roles in everyday challenges such as responding to threats and building relationships. But emotions also help in other, more intellectual challenges for humans. Compared with other animals, we are born with little knowledge but have the potential for enormous intelligence. Emotions such as surprise, interest, and confusion first signal that something out of the ordinary has happened that deserves our attention. They then motivate us to engage with the new things that strain our understanding of the world and how it works. Emotions surely help us to fight or flee, but I believe that more importantly, they aid in learning, exploring, and reflecting.

What can we understand from Paragraph (2) about a good hug?

- (A) It is likely the result of the two people involved feeling happy
- (B) Scientists argue it works as a reward for achieving a goal
- (C) It may cause different feelings in different people
- (D) Theories disagree over its emotional value

How are functionalist theories of emotions different from appraisal theories?

- (A) According to functionalist theories, emotions come from how we judge what happens in the world.
- (B) According to functionalist theories, emotions help us build relationships or respond to threats.
- (C) According to functionalist theories, events in the world cause emotions.
- (D) According to functionalist theories, emotional intelligence is more important than logical intelligence.

What idea does the word "relationships" in Paragraph (4) repeat?

- (A) human emotional experience
- (B) evaluations and judgments
- (C) attachments to other people
- (D) more intellectual challenges

Which of the following is the writer's opinion?

- (A) People experience many emotions
- (B) People know very little at birth
- (C) Happiness and sadness are emotions
- (D) Emotions help us learn, explore, and reflect

What can we understand from the passage about emotions?

- (A) Emotions may sometimes prevent us from achieving our goals
- (B) Emotions make us want to know more about the world around us
- (C) Scientists have decided there are seven basic types of emotions
- (D) The latest research has changed the way we now think about emotions

The Spanish Flu الانفلونزا الإسبانية

(1) From 1918 to 1920 the virus known as the Spanish Flu infected 500 million people worldwide, killing 50 to 100 million of them. The only continent it did not reach was Antarctica; deaths were registered from northern Alaska to the islands of Samoa. The virus began in conditions that were perfect to help it spread across the globe, turning the battlefields of World War I into huge centers of infection.

Though the flu had long been a familiar disease, the subtype (special type) of 1918 took scientists by surprise. They were shocked as much by the speed of its spread as by the number of people it killed.

Though some experts believe the virus's origins were in Europe, the theory most accepted today suggests that it began in the United States, and later travelled on an army ship to the battlefields of France. From there, an army of disease germs, like enemy soldiers in a secret war 'Ashgan', spread out through the air and infected a third of the world's population, killing between 2.5% and 5% of

everyone on earth. In the future, suggests the World Health Organization, there will be more and perhaps more deadly flu pandemics (worldwide diseases), threatening global health and security and putting the future of human society at risk. The virus won't need a great war to help it cover the earth; it will be enough for one carrier to get on an airplane and, in less than 20 hours, cover the distance between Tokyo and New York, or between Sydney and Doha.

What phrase other than "Spanish Flu" does the writer use to describe the deadly virus of 1918?

- (A) enemy soldiers
- (B) Scientists argue it works as a reward for achieving a goal
- (C) It may cause different feelings in different people
- (D) Theories disagree over its emotional value

Which of the following statements about the Spanish Flu is an opinion?

- (A) It began in the United States
- (B) It killed at least 50 million people
- (C) There were no infections in Antarctica
- (D) Now it could spread across the world in one day

How is the view of some experts about the origins of the Spanish Flu different from the most common view?

- (A) They believe there were two types of the virus
- (B) They believe it started in the United States
- (C) They believe it was a biological weapon
- (D) They believe it began in Europe

What can we understand from the passage about World War I?

- (A) It was a secret war
- (B) It was the origin of the Spanish Flu
- (C) It increased deaths from the Spanish Flu
- (D) It killed between 50 and 100 million people

What can we understand from the passage about the Spanish Flu?

- (A) Governments lied about it
- (B) It would spread faster now
- (C) It will come back in the future
- (D) Fewer people would die from it now

Listening

الاستماع

Listening

Research Task

Q: Where does the lecturer tell the students to search first?

A: Google

Eiffel Tower

Q1: What is the conversation mainly about?

A: The history of the Eiffel Tower

Q2: What did the students ask about?

A: Why the tower is still standing.

Survey

Q1: What does the professor suggest?

A: That it is difficult work.

Q2: What does the student think is easy?

A: Finding enough people..

Listening

Trade and Princess

Q: What units does the lecturer ask students to study?

A: Units 6 to 10, except unit 9

Airlines

Q1: What is the name of the company?

A: Alies Airlines.

Q2: What is the flight distance?

A: 1500 km.

Pepsi

Q1: What is the main idea of the listening?

A: The history of Pepsi.

Q2: What extra information does the speaker give?

A: That soft drinks like pepsi are unhealthy.

Listening

Overfishing

Q: How can countries reduce overfishing?

A: If they cooperate with each other

IKEA

Q1: What is the new idea in IKEA?

A: Custom furniture

Q2: Where is the first branch of IKEA located?

A: Sweden

Q3: When did IKEA launch its first branch in Norway?

A: In 1963

Bear and Speed

Q1: How many types of beer are there?

A: Eight types of beer

Q2: What is the speed mentioned?

A: 40 km.

Listening

New Zealand Housing Crisis

Q: What is the main idea?

A: Housing Crisis

Queen Elizabeth II

Q1: What is an important fact about Queen Elizabeth II?

A: She raced birds

Q2: When will the students present their presentation?

A: On Sunday

Q3: Which chapters will be included in the quiz?

A: Chapters 1-2

Memory book

Q1: What does Arwa make?

A: She makes a memory book

Q2: What is the answer to the second question?

A: Notes

Listening

Pizza Order

Q: How much is the pizza?

A: 65 SR

Computer

Q1: What year was mentioned in the listening about the first computer?

A: 1962

Q2: When was the first electronic computer created?

A: 1940

Q3: When was the first personal computer created?

A: 1970

Train / Package

Q1: When will he actually book the train?

A: He will book it on Sunday

Q2: Which package does he actually choose?

A: Economy package

Listening

Telescope

Q1: What is the main idea of the telescope?

A: To make objects look bigger

Q2: When was the telescope invented?

A: In 1608

Q3: Who Invented it?

A: Galileo

Q4: What nationality is Galileo

A: Italian

Test Conversation

Q1: What is the test about?

A: It is about Chapter 7

Q2: What happened on Tuesday?

A: Something happened at the library

Listening

Music and Shopping Choices

Q1: How does music affect people's food choices?

A: Loud music makes people want fast food, while soft music makes them want healthy food.

Q2: Why does this happen?

A: Because soft music makes people feel relaxed

Q3: What does the teacher think music can affect?

A: People's feelings

Q4: What does the teacher think the research needs?

A: More study

Geography

Q1: What is the passage mainly about?

A: Geography

Q2: What is the second largest river by area?

A: Amazon River

Listening

Life Expectancy

Q: Who lives longer, women or men?

A: Women lives longer then men

Starlite

Q: What is the benefit of Starlite?

A: It reduces fire

Great Mosque of Córdoba

Q: What is the most important fact mentioned by the lecturer?

A: It was the largest mosque in Europe

Mushrooms

Q: Why can eating wild mushrooms be dangerous?

A: They can contain toxins that cause poisoning

Listening

Tigers

Q1: How many types of tigers are there?

A: There are eight types of tigers

Q2: What is the speed of the black tiger?

A: The speed of the black tiger is 40 kilometers per hour

Q3: What is the most important thing mentioned about the tiger?

A: It is afraid of water and it eats different kinds of meat

Q4: What does the tiger eat?

A: Meat such as horses, rats, and chickens

Q5: What is the main idea of the passage?

A: Saving tigers from extinction

Q6: What is one of the reasons tigers are endangered?

A: illegal hunting

Q7: What can help protect tigers?

A: Creating wildlife reserves

What time does Dan get up?

- (A) At 6 o'clock
- (B) At 5 o'clock
- (C) At 7 o'clock

What does Dan do after he gets up?

- (A) Goes to the gym
- (B) Eats breakfast
- (C) Goes to the pool

What time does Dan go to university?

- (A) At 9 o'clock
- (B) At 10 o'clock
- (C) At 11 o'clock

What is Dan studying?

- (A) Business Administration
- (B) Sports Science
- (C) Computer Science

Listening

Record 3

استمع للتسجيل ثم أجب على الأسئلة

For his main course, Andi chooses

- (A) a normal cheeseburger
- (B) a double cheeseburger
- (C) burger with chips

For dessert, Andi chooses

- (A) ice cream
- (B) chocolate cake
- (C) banana cake

To drink, Andi chooses

- (A) apple juice
- (B) fizzy water
- (C) still water

How much does the meal cost?

- (A) £8.73
- (B) £7.38
- (C) £8.37

Listening

Record 4

استمع للتسجيل ثم أجب على الأسئلة

Ben

- (A) doesn't study
- (B) studies and does well
- (C) studies but doesn't do well

Ben usually studies

- (A) in the library
- (B) at home
- (C) in his friend's house

On Ben's desk there are

- (A) papers, books and pens
- (B) pencils, books and pens
- (C) a pencil case and pens

Katy

- (A) has a break for thirty minutes
- (B) exercises for thirty minutes
- (C) studies for thirty minutes

Listening

Record 5

استمع للتسجيل ثم أجب على الأسئلة

What does Jamie order as a starter?

- (A) Tomato salad
- (B) French onion soup
- (C) Thai chicken

What does Sally want to eat for the main course?

- (A) Steak
- (B) Thai chicken and rice
- (C) French onion soup

What drink does Sally order?

- (A) Mineral water
- (B) Fresh orange juice
- (C) Coffee

How many people are at the table?

- (A) Two
- (B) Three
- (C) Four

Listening

Record 6

استمع للتسجيل ثم أجب على الأسئلة

In direction A, which street should you turn onto?

- (A) King's Road
- (B) Green Street
- (C) Queen Street

In direction B, where is the destination located?

- (A) Opposite the shop
- (B) On the left next to the shop
- (C) On the right next to the shop

In direction C, what do you do at the roundabout?

- (A) Turn right
- (B) Turn left
- (C) Go straight

In direction C, what is the building opposite the destination?

- (A) Bookshop
- (B) Hospital
- (C) Café

Listening

Record 7

استمع للتسجيل ثم أجب على الأسئلة

What is the customer looking for?

- (A) A pair of shoes
- (B) A T-shirt
- (C) A jacket

What colour T-shirts are available in medium?

- (A) Black and red
- (B) Purple and white
- (C) White and black

What size does the customer want?

- (A) Small
- (B) Large
- (C) Medium

How much does the T-shirt cost?

- (A) £20
- (B) £15.50
- (C) £10.95

استمع للتسجيل ثم أجب على الأسئلة

Why is Clare worried?

- (A) She lost her history book
- (B) She has a history exam on Friday
- (C) She didn't do her homework

What is the problem with Clare's notes?

- (A) They are too messy
- (B) They are too long and full of text
- (C) They don't include dates

What does Mark suggest to help Clare remember information?

- (A) Write everything in full sentences
- (B) Draw pictures and write key words
- (C) Use a computer to type notes

What do the crown and the 'H' in Mark's drawing represent?

- (A) King and Henry
- (B) History and Homework
- (C) Heart and Hat
